Country Origin

Starling Monitoring System – DCF Methodology*

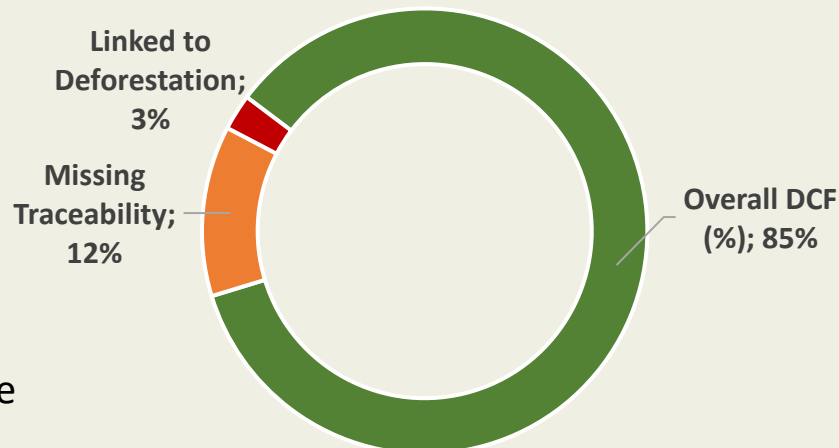

165.030 tons

100% TTM

359 Mills

88% TTP

85% Deforestation-free score

*cut-off date of December 2015

No Deforestation Commitment

Aligned with our public [Responsible Sourcing Policy](#), LIPSA is committed to source palm oil from responsible and deforestation-free origins. We share our [Mill list](#) on LIPSA's website.

In collaboration with Earthworm Foundation (EF), we monitor our deforestation performance applying the **Deforestation and Conversion Free (DCF) methodology** and maintain continuous engagement with our direct suppliers to ensure alignment with our commitments and readiness for **EUDR implementation**.

To reinforce responsible sourcing, LIPSA and EF developed a **Grievance Mechanism** and **Decision Tree** to engage key suppliers, request additional information, and ensure effective management of deforestation cases.

Additionally, LIPSA supports a social transformation project in [Guatemala](#) to strengthen the livelihoods and resilience of local palm oil producers.
